By Registering and Voting

## OUR LEAKING ROOF

Since the club opened there have been problems with a leaking roof. Both the main contractor and the roofing sub-contractor went into liquidation shortly after the club opened. As there was no way of getting them back, the club has spent what it could on repairs.

A team of club members worked hard on the roof 2 years ago removing over 4000 patches of flaking paint, sealing the patches and then re-coating the entire roof - 1850m<sup>2</sup>. Whilst this work did stop further rusting and improved the appearance of the roof, we still have several

leaks, some of them very serious, that are causing damage to the very expensive playing surface.

The Board believes that we need a completely new roof in order to eradicate all the leaks and resultant damage.

We propose that the existing roof will need to remain in place and a new roof will be fitted over it to allow activities to continue.

This is a metal clad "portal" style building and is not well insulated. A new roof will allow space for 200mm of insulation, to be fitted as an additional benefit.

**This work is now urgent.**

We have quotations approaching £60,000 for this project and limited funds to help towards the work. We are applying for £25,000 from Aviva Community Fund which would bridge the gap and allow us to proceed with the work.
